

# Module Description General Business

Faculty AWW – School of Management

Summer term 2025

#### TECHNISCHE HOCHSCHULE DEGGENDORF

#### CONTENT

•	Advanced Methods in Procurement3
•	Basics Sustainability5
•	Communication and Presentation Techniques8
•	Cross Cultural Management11
•	Introduction to Air Transport Management14
•	Market Research incl. SPSS15
	Strategic planning versus constant change: Tools and actices for future Leaders to navigate challenging times16
•	Company Creation – From scratch to 1 <sup>st</sup> stage
•	Global Leadership19

#### **ADVANCED METHODS IN PROCUREMENT**

Lecturer	Prof. Dr. Diane Ahrens
Course number and name	Z6100 Advanced Methods in Procurement
Semester	IM 6
Duration of the module	1 semester
Module frequency	yearly
Level	undergraduate
Semester periods per week (SWS)	4
ECTS	5
Workload	Time of attendance: 60 hours
	self-study: 90 hours
	Total: 150 hours
Type of Examination	Written exam
Duration of Examination	90 min.
Language of Instruction	English

#### **Module objective**

This course is split into two parts:

Part 1:

The broad scope of this course starts from principles of sourcing to strategic procurement decisions like low cost country sourcing, procurement concepts like consignment inventory, vendor managed inventory. Prices and Total Cost are analyzed, suppliers evaluated, and development strategies discussed.

Part 2:

The second part focusses on quantitative methods: Times series are analyzed and different forecasting methods needed for purchasing decisions are trained. Based on this disposition decisions - timing and quantity of orders - are made.

#### Learning content

Part I:

- 1. Development of Purchasing Function
- 2. Leverage Effect of Procurement
- 3. Best Cost Country Sourcing
- 4. Sourcing Strategies
- 5. Price and Total Cost Analysis
- 6. Supplier Evaluation and Development
- 7. Replenishment Strategies & Procurement Logistics

Part II:

- 1. Linear and Multiple Regression
- 2. Time Series and Forecasting Methods
- 3. Disposition and Ordering
- 4. Newsvendor and other Models

#### Methods

The course features lectures introducing to strategic sourcing and procurement logistics theory in an international business environment, focused lectures based on selected procurement categories, class discussion, group activities, situational analysis and comparison, and integrative experiential learning.

TECHNISCHE HOCHSCHULE DEGGENDORF

Self-managed student work teams develop procurement strategies based on given case studies, e.g. for steel bulk buying or specific injection molded plastic parts. Students are confronted with procurement decisions from the real world cases and then compare their responses to actual management actions.

# BASICS SUSTAINABILITY

Lecturer	Prof. Dr. Robert Feicht
Course number and name	Z6100 Basics Sustainability
Semester	IM 6
Duration of the module	1 semester
Module frequency	yearly
Level	undergraduate
Semester periods per week (SWS)	4
ECTS	5
Workload	Time of attendance: 15 hours
	self-study: 135 hours
	Total: 150 hours
Type of Examination	Written exam
Duration of Examination	90 Min.
Language of Instruction	English

#### **Course Objective**

The consistent overstepping of planetary boundaries by humans is the cause of many environmental problems and social tensions regionally, globally and between generations. For sustainable development in the sense of a fair distribution of resources, an interdisciplinary approach to solutions and the consideration of the interrelationships of social, ecological and economic factors and actors are indispensable. The course "Basics Sustainability" teaches the most important sustainability models and analysis methods for sustainable development. From environmental and resource economics, basic methods for a fair distribution of environmental goods as well as environmental policy instruments and tools for sustainable spatial design are presented. With regard to materiality, the goal is the use of renewable raw materials for the production of materials and products, the recycling or pollutant-free landfilling of existing products and materials, and the optimisation of natural processes from a material and energy point of view. Against the background of climate change, students learn about current technologies and developments and assess measures in the field of renewable energy systems in the context of grid expansion, energy distribution and storage technologies.

# **Course Contents**

The course consists of bi-weekly on-site lectures in Deggendorf, which will give you an overview of the four different chapters, and self-study online lectures (vhb).

- 1. General principles of sustainability
- 1.1 Introduction to sustainability
- 1.2 Social transformation

TECHNISCHE HOCHSCHULE DEGGENDORF

- 1.3 Corporate responsibility
- 1.4 Sustainability management
- 1.5 Life cycle assessment
- 1.6 Education for sustainable development

#### 2. Economic framework for sustainability

- 2.1 Fundamentals of resource, environmental and public good economics
- 2.2 Sustainability policy
- 2.3 Game theory and behavioural economics in the context of sustainability
- 2.4 Economics of climate change
- 2.5 Sustainable regional development
- 3. Materiality and sustainability
- 3.1 Resource consumption and finiteness
- 3.2 Primary/secondary biomass and material cycles
- 3.3 Materials from renewable resources
- 3.4 Recycling and biorefinery concepts
- 4. Energy and sustainability
- 4.1 Introduction to energy and sustainability
- 4.2 Climate change and greenhouse effect
- 4.3 Fundamentals of selected technologies
- 4.4 Future energy systems

# **Course Structure and Methods**

General principles of sustainability: Students learn about the interrelationships of social, ecological and economic factors and actors and apply basic sustainability models and analysis methods.

Economic framework of sustainability: Students learn methods of environmental and resource economics and assess the use of sustainability policy instruments.

Materiality and sustainability: Students understand the material cycles of the earth and learn about the production of materials from renewable raw materials and the recycling and disposal of products.

Energy and sustainability: Students understand the basics of climate change. They learn about current technologies and developments and assess measures in the field

of regenerative energy systems in the context of grid expansion, energy distribution and storage technologies.

COMMUNICATION AND PRESENTATION TECHNIQUES

Module code	G-13
Module coordination	Prof. Dr. Adrian von Düring
Course number and name	G2116 Communication and Presentation Techniques
Lecturers	Prof. Dr. Adrian von Düring
	Ruth-Maria Burkhardt
Semester	2
Duration of the module	1 semester
Module frequency	yearly
Course type	required course
Niveau	undergraduate
Semester periods per week (SWS)	2
ECTS	2
Workload	Time of attendance: 30 hours
	self-study: 30 hours
	Total: 60 hours
Type of Examination	oral examination, oral ex. 15 min.
Duration of Examination	15 min.
Language of Instruction	English

# **Module Objective**

The main goal is to improve students listening, speaking and presentation skills through theory, observation, practice and group feedback. They also learn to argue in debating sessions.

Besides this they will develop the skills that are necessary to prepare presentations, to speak with confidence and to plan and use visual aids effectively. Students learn what communication is, how culture, language choices and non-verbal clues affect the image presented, how to organize a message, how to make persuasive presentations. Students also learn how to be effective listeners and give qualified feedback.

# Weight

none

# **Entrance Requirements**

None

# Learning Content

The course covers communication and feedback, body language, organizing thoughts and data, voice, non-verbals and audience interaction and visual aids.

Students are expected to incorporate the following themes into their presentations: Basics of successful presentations How to use visual aids including PowerPoint How to avoid over-presenting with PowerPoint and other media The logistics of presenting. What to do when things go wrong Students will develop and improve these skills during debates: What constitutes effective leadership behavior? How to give and receive feedback in a debate? What are some obstacles to effective communication and how these can be overcome? What does a presenter need to know about nonverbal communication? When is assertive behavior appropriate in communicating? What are the elements of persuasive presentations? What are effective response styles? How to argue convincingly?

How can a verbal confrontation produce its intended result?

What are effective ways to organize a message?

# **Teaching Methods**

The course is conducted like a professional workshop. Students begin by making short presentations on a variety of theoretical and practical topics related to oral presentations and communication techniques. After individual feedback and coaching and discussion rounds with peers, students then evaluate a professional presentation and develop guidelines for improving their own subsequent presentations.

Students also participate in a workshop to learn the principles of debating techniques. Students get the opportunity to practice in a small group forum.

	Total: 150 hours
Type of Examination	student research project, practical course assessment
Language of Instruction	English

# CROSS CULTURAL MANAGEMENT

#### **Module Objective**

Cultural differences among international business partners, customers and suppliers often result in tension and misunderstandings. Managers who competently navigate in different cultural environments can contribute substantially to the success of globally active enterprises.

A condition for the acquisition of 'intercultural competence' is the recognition that one's own actions are influenced by one's own cultural values and norms. Reflecting on one's own cultural background forms the basis for the understanding of foreign cultures.

In the first part of the course the participants acquire the knowledge they need to explain and understand various cultures. Through the comparative study of cultures, they discover the relevance of the cultural framework to management theory and for explaining management behavior.

Participants learn how to independently apply the 'culture assimilator' technique to broaden their knowledge through a qualitative research project. This involves soliciting international managers and collecting 'critical incidents' of cross cultural business interactions, which are then analyzed with the help of theory. Carrying out qualitative interviews with members of foreign cultures further develops the participants' social and intercultural skills.

The second part of the course is conducted as an off-campus intensive 'social and intercultural competence'-training workshop. Here the results of the culture-assimilator research projects are presented through role-playing in situational re-enactments. The implications are further clarified through a variety of interaction exercises.

The social and intercultural competence training assists the participants in their ability to reflect on cultural identities, to avoid value judgments in their perception of foreign cultures, to empathize and accept differences as well as to develop additional options for actions international managers can take.

### **Learning Content**

- 1. Introduction: Cultural Differences
- 2. Defining Culture
  - o Examples
  - o The Characteristics of Culture
  - o The Layers and Elements of Culture
- 3. Comparing Culture
  - o The Impact on the Individual: the "Culture Shock"
  - o Culture Contexts: Hall
  - o Culture and the Workplace: Hofstede
  - o Gesteland's Cultural Patterns
- 4. Summary

Additional course materials provided by the vhb-course "Interkulturelle Kompetenz"

(English Version), Augsburg University, Prof. Dr. Martina Rost-Roth:

Module 2: Intercultural Awareness

o Lesson 1 - Intercultural Awareness

Module 3: Assessing Culture

- o Lesson 1 Definitions of Culture
- o Lesson 2 Dimensions of Culture
- o Lesson 3 Leadership Styles and Cultural Standards

Module 5: Intercultural Business Communication

o Lesson 3 - Intercultural Training

#### **Teaching Methods**

The course begins by conveying the fundamentals of cross-cultural management via theoretical lectures, self-organized virtual learning (vhb-course) and moderated discussions. Since most of the participants have intercultural experiences assembled from a wide variety of cultures, the theory can be directly tied to many of the individual experiences.

The theoretical fundamentals are then extended through the development, application and presentation of the culture assimilators. The qualitative research projects are performed in groups organized along the principles of self-organized learning. The projects help develop individual competence in applying the scientific method and also further the development of presentation, social and intercultural skills.

Short case studies, 'critical incidents', are selected from the international business world. Explanations and analysis of these cases support the integration of the participants' existing management knowledge with intercultural perspectives.

Social and intercultural skills are further developed in the training workshop through role playing, interaction exercises, problem solving tasks, simulations and feedback rounds.

# INTRODUCTION TO AIR TRANSPORT MANAGEMENT

Lecturer	Jack Romero
Course number and name	T3118 Introduction to Air Transport Management
Semester	TM 4
Duration of the module	1 semester
Module frequency	yearly
Level	undergraduate
Semester periods per week (SWS)	4
ECTS	5
Workload	Time of attendance: 60 hours
	self-study: 90 hours
	Total: 150 hours
Type of Examination	Written paper
Language of Instruction	English

#### Learning content

The Introduction to Air Transport Management course is designed to give you a brief insight into the world of airlines, airports and air transport industry in general by covering topics such as, but not limited to:

- o Airline business
- o Airline operations
- o Airline marketing
- o Aircraft fleet planning
- o Airport business
- o Air transport economics
- o Quality management of airline operations
- o Statistical Analysis
- o Research Methods and Forecasting

# MARKET RESEARCH INCL. SPSS

Lecturer	Dr. Melanie Hazod
Course number and name	A4121 Market Research incl. SPSS
Semester	BW 4
Duration of the module	1 semester
Module frequency	yearly
Level	undergraduate
Semester periods per week (SWS)	4
ECTS	5
Workload	Time of attendance: 60 hours
	self-study: 90 hours
	Total: 150 hours
Type of Examination	Written research paper
Language of Instruction	English

#### **Module objective**

This lecture should lead you to an understanding of the uses and abuses of market research.

After completing the module, you should be able to:

- o evaluate the usefulness of market research for the problem you are involved with
- discuss appropriate types of research with confidence
- set yourself realistic expectations regarding the results/ timing
- o understand the importance of market research
- perform a complete market research project
- know the statistical software SPSS and can operate basis analysis
- o analyze questionnaires under quality aspects

# STRATEGIC PLANNING VERSUS CONSTANT CHANGE: TOOLS AND PRACTICES FOR FUTURE LEADERS TO NAVIGATE CHALLENGING TIMES

Lecturer	Christopher Lohwasser
Course number and name	Strategic Planning versus constant change: Tools and practices for future leaders to navigate challenging times
Semester	IM 6
Duration of the module	1 semester
Module frequency	yearly
Level	undergraduate
Semester periods per week (SWS)	4
ECTS	5
Workload	Time of attendance: 60 hours
	self-study: 90 hours
	Total: 150 hours
Type of Examination	Case studies + presentation
Language of Instruction	English

# **Module objective**

The elective "Strategic Planning versus constant Change" shall provide future managers the **awareness, tools and processes** necessary for **strategic planning** and **positive leadership** to be applied in **times of extraordinary challenges**.

# Learning contents

- Foundations of Strategic Management
  - Understanding Vision, Mission and Goals
  - Defining Strategies
- Tools and Methods of Strategic Planning
  - Michael Porter's Strategic Frameworks
  - Henry Mintzberg 5P's
  - Fredmund Malik's CPC
- Understanding extraordinary Challenges
  - Attributes of "uncertain times"
  - VUCA
- Methods of (Project-)Management in non-linear situations
  - Waterfall Project Planning
  - Agile methods, Scrum and Kanban
  - Objectives and Key Results (OKR)

- Leadership in uncertain times
  - Henry Fayol and his principles of Management
  - Ethical Aspects of Leadership in uncertain times

#### **Teaching Methods**

The course combines a lecture type course with elements of case- studies, and real business applications. Students are asked to share experiences from their internships, and previous roles.

#### Course structure and final grade

The course will be held in blocks on Fridays and Saturdays, there will be remote consultancy sessions for the presentations and case studies.

**Individual presentation** (10min) based on **case studies** incorporating a real-world situation and the principles and methods taught.

COMPANY CREATION – FROM SCRATCH TO 1<sup>ST</sup> STAGE

Lecturer	Prof. Dr. Reijo Koivula
Course number and name	Company Creation – from scratch to 1 <sup>st</sup> stage
Semester	GB
Duration of the module	1 semester
Module frequency	yearly
Level	undergraduate
Semester periods per week (SWS)	4
ECTS	5
Workload	Time of attendance: 60 hours
	self-study: 90 hours
	Total: 150 hours
Type of Examination	Written paper + presentation
Language of Instruction	English

# **Module objective**

For whom: anyone who is interested to create a startup or a company

When a student has completed this course, he or she will be able to: Understand the basic principles of founding a company in different EU countries and also globally. He/she will understand the different processes involved in forming a new (service) business. The student can understand and prepare a basic business model and value propositions. The student will become familiar with the computer skills required in establishing a company. These are put to use, with particular emphasis being placed on software-knowledge, through the deployment cloud technologies. Media creation is explored for new company publicity and public relations, which is learned together with key aspects of new company marketing and sales.

#### Learning contents

- Business plan, canvases
- Company forms
- Insurances
- Registration
- Work force buying and hiring
- Management and leadership, team
- Funding
- Required IT
- Commercialization, media, social media, marketing, sales

# **GLOBAL LEADERSHIP**

Lecturer	Matthias Koeppen
Course number and name	Global Leadership
Semester	GB
Duration of the module	1 semester
Module frequency	yearly
Level	undergraduate
Semester periods per week (SWS)	4
ECTS	5
Workload	Time of attendance: 60 hours
	self-study: 90 hours
	Total: 150 hours
Type of Examination	30 % group work and 70 % assignment paper
Language of Instruction	English

#### Intro

"I want to lead people!" – Do you think you have it in you? What makes you think you can and much more do you want to lead? What does Leadership actually mean in the 21<sup>st</sup> century?

"I wish to manage large diverse cultural teams!" What is the difference between Management vs. Leadership? What is Culture and how does the Global Context impact Leadership?

What is Sustainability and Business Ethics? As St. Ambrose said: "When in Rome, do as the Romans do!" While the phrase encourages adaptability, it doesn't mean you should compromise your core values or ethics. It's about finding a balance between respecting local customs and staying true to yourself. Where do you draw the line?

This course should answer these questions! Students will remember this course on their first business trip for e.g. a meeting in Shanghai or when receiving international guests as hosts in Germany! This course cannot offer gaining the real-world experience but provides a framework and guidelines on the way to becoming a Global Leader!

# Learning Content

The "Global Leadership" course is designed to equip students with the essential knowledge, skills, and competencies required to lead effectively in a globalized and interconnected world. The course explores the challenges and opportunities of leading diverse teams, managing cross-cultural dynamics, and navigating **complex global** environments. Through a combination of theoretical frameworks, case

studies, and practical exercises, students will develop a deep understanding of what it means to be a global leader in the 21st century.

#### Learning Objectives:

By the end of this course, students will be able to:

- 1. Understand the key concepts, theories, and models of Leadership and Global Leadership in particular.
- 2. Analyze the impact of cultural, social, and economic differences on leadership practices.
- 3. Develop strategies for effective communication and collaboration in multicultural teams.
- 4. Apply ethical decision-making frameworks to address global challenges.
- 5. Demonstrate adaptability, resilience, and emotional intelligence in leadership roles.
- 6. Reflect on their own leadership style and identify areas for growth in a global context.

#### **Course Content:**

#### 1. Introduction to Global Leadership:

- o Defining global leadership
- The role of globalization in shaping leadership practices
- Key competencies of global leaders
- 2. Cultural Intelligence and Cross-Cultural Communication:
  - Understanding cultural dimensions (e.g., Hofstede, Trompenaars)
  - Overcoming cultural barriers in communication
  - Building trust and rapport across cultures
  - Country Cluster specific examples (Northern Asia CN, JAP, North America – USA, Europe – DACH, Scandinavia, Eastern Europe)
- 3. Leading Diverse and Virtual Teams:
  - Strategies for managing geographically dispersed teams
  - $\circ~$  How to behave in global business meetings, business practices and standards What To-Do and NO-GOs

#### 4. Ethical Leadership and Social Responsibility:

- Ethical dilemmas in global leadership
- Corporate social responsibility (CSR) and sustainability
- Balancing profit and purpose in a global economy

#### 5. Global Leadership in Practice:

- Case studies of successful global leaders
- Developing a personal leadership action plan

#### **Teaching Methods:**

- Interactive lectures and discussions
- Group work and case study analysis
- Role-playing and simulations
- Guest lectures
- Reflective journaling and self-assessment exercises

#### **Assessment Methods:**

- 1. **Group Presentation (30%):** A team-based presentation on a global leadership challenge, including proposed solutions and strategies.
- Assignment (70%): A personal reflection on the student's leadership style, cultural intelligence, and areas for development.
