Job fair

MESSAGE

FROM THE PRESIDENT

Dear Students, Visitors and Exhibitors,

It's a great pleasure for me to welcome you to the third job fair at the European Campus Rottal-Inn.

We believe that getting an excellent degree is about gaining practical experience in a working environment on top of receiving excellent academic education in the lecture theatres. Therefore, the objective of our annual European Campus job fair is to establish an attractive platform for employers and students where they can network with each other to acquire valuable personal contacts. Students can showcase their skills and inquire about available vacancies for internships or graduate jobs, while companies can view suitable potential employees who are academically skilled in their particular field of business.

I would like to thank the Deggendorf Institute of Technology's Career Service, the students' association First Contact e. V. as well as the Wirtschaftsförderung Rottal-Inn (association for economic development in the Rottal region) for the effort and work they put into the planning of the job fair. Furthermore, I would like to thank all exhibitors, who are committed to supporting young people in taking their first steps into their professional lives.

Prof. Dr. Peter Sperber, President of DIT/THD

HOW TO USE THIS GUIDE

This symbol shows which companies will check students' job applications.

This stamp shows which companies offer cooperate studies, also known as combined dual studies.

This tick shows which companies offer training or work experience abroad.

WELCOME FROM FIRST CONTACT

Dear Exhibitors,
Dear Prof. Dr. Sperber, Dear mayor Beißmann, Dear Professors and Students,

The firstcontact job fair in Deggendorf shows that job fairs are becoming increasingly more popular. The European Campus can boast 21 exhibitors in its third year. We are proud of this demand as it shows that companies believe in our concept.

As a result of the students' fantastic education, they have the potential to become able and motivated highly-skilled employees with great social skills. Apart from specialized knowledge, it is also important to leave a positive first impression with a company. The Career Service offers various seminars that will teach you how to leave a positive impression with your written application.

Our aim as the student association First Contact e.V. is to offer European Campus students the opportunity to get in touch with company representatives from a wide range of industries about study theses, internships and career opportunities. Furthermore, we hope that professors make contact with different companies and create joint projects with DIT. This ensures that students gain insight into the working life during their studies. We would like to thank all our members for their trust in our team.

We would like to thank the Career Service and DIT for their participation and we are proud that together we have made this job fair possible.

Finally, I would also like to thank the First Contact Team, the staff members of DIT and the European Campus, and President Prof. Dr. Sperber. A particular thank you goes to the Career Service for the fantastic planning of the third job fair. On behalf of First Contact e. V., I wish you a successful job fair and many fruitful conversations.

Benedikte Hellfeier
Chairwoman firstcontact e.V.

WELCOME FROM RESP e.V.

We welcome you with joy to the third job fair at the European Campus Rottal-Inn.

To the students, this is an opportunity to talk to many of the companies and a unique gathering to form a partnership between potential employers and employees. I recommend that you ask questions some of which should include what a company can offer you and if you can fulfill your potential within that company. While at it, you can showcase your skills and inquire about available internship positions as many students got their internships from previous job fairs.

To the exhibitors, thank you for your yearly support and collaborations. We ask that you continue to give our students opportunities to turn their theoretical knowledge into a practical experience as they gain experience in their chosen fields.

Thank you and we look forward to having a great time.

Viola Iwuajoku
Chairwoman of RESP e.V.

RESP e.V.

CAREER SERVICE

ADVICE & SUPPORT

Prepare for life beyond university by seeking guidance from your Careers Advisors as well as attending university workshops and seminars about job applications, interview techniques, internships, and much more.

**ECRI Career Advisors:
Olga Stikel & Daniela Schwertlinger**

WE WILL HELP YOU TO PREPARE FOR YOUR CAREER

Online job board

Pfarrkirchen, 06 November 2019

Application as electrical engineer, your offer on the DIT job platform

Dear Mr./Ms. Eckinger,

research the contact person

Thank you very much for the informative and friendly talk at the Job fair European Campus in Pfarrkirchen on 06 November 2019. This once more encouraged me to apply as an electrical engineer with knowledge in developing and controlling in automotive electronics.

Try to write an interesting introduction without empty phrases

I am currently writing my bachelor thesis about "Conceptualizing and developing control devices in cars". I have already gained theoretical knowledge at Deggendorf Institute of Technology in the technical electronics major, which is about automotive electronics and their programming. Before my studies, I worked as an electronics engineer for two years. Self-reliant project work was a crucial part of my tasks. Therefore, I am used to structured and target-oriented work. During my internship at Auto AG, I worked with technology and administration specialists and was able to gain experience in multi-functional teams.

Body:
What experience and professional skills can you contribute? Try to give examples that proof your soft skills. Try to address the demands in the job offer.

In the course Control Units in Cars, I was able to proof successfully my analytical skills. The course aim was to research the function of control units and program them for certain tasks. I particularly enjoyed analyzing complex problems and finding a solution.

At the "Bewerbertraining" seminar at Deggendorf Institute of Technology, I was able to gain first positive insights into your industry-leading company.

I would like to support your company by January 2020.

I am looking forward to an invitation for an interview.

Complimentary close

Relation between you and the company.
